

Menlo Atherton Cooperative Nursery School TB Test Requirement:

Proof of a negative TB test is required for all parents who plan to work at the school during the course of the year

- TB test must be one of the following:
 - an intradermal Mantoux 5TU PPD skin test
 - a chest Xray
 - Quantiferon (blood test)

You may get your test through your doctor or a health clinic. The San Mateo County Department of Health offers inexpensive tests. For information, please call (650) 573 2877.

You may use the form below to obtain written verification of your test and the results. **The TB test is valid for four years. Once expired you will need to renew and submit proof.**

If you have had a TB test in the last four years, you may send us proof of the test instead of having another test.

Participating Parent, Caregiver or Relative:

Date of TB Test: ____/____/____
